

COMMUNITY HEALTH NEEDS ASSESSMENT TOP HEALTH PRIORITIES

- 1 Access to health care
- 2 Aging population
- 3 Chronic disease

COLLABORATION EXAMPLE

"In Parsons, Labette Health Center was instrumental in our establishment of a new clinic in Parsons providing space in what was their Urgent Care Center which they vacated for us to occupy. Additionally, we have contracted with them to provide prenatal, obstetrical and postpartum care to our patients."

CARE COORDINATION & PATIENT-CENTERED MEDICAL CARE

"To further enhance PCMH, CHC/SEK transitioned in March 2015 to a fully-integrated medical record with medical, dental and mental health records all one with treating providers now having access to the complete record enhancing coordination of care. Our expanded facility in Pittsburg was designed to support the PCMH model with "pods" housing care teams and primary medical, dental and mental health services co-located along with a pharmacy, radiology, optometrist, audiologist and physical therapy supported by patient navigators, case managers, translators and outreach and eligibility specialists."

ADDRESSING COMMUNITY HEALTH PRIORITIES

"In addition to operating clinics throughout the region in Pittsburg, Columbus, Baxter Springs, Coffeyville, Iola, Independence and most recently in Parsons to provide increased access to medical, dental and mental health care regardless of ability to pay and recruiting a new generation of health providers to staff them, CHC/SEK is prioritizing addiction treatment in SFY 2017."

COMMUNITY PARTNERSHIPS

HOSPITAL "provides obstetrical and newborn care along with general medicine and pediatric services... clinic has staff to coordinate care and manage routine admissions"

HEALTH DEPARTMENT "good relationship... director serves on the clinic's board of directors"

MENTAL HEALTH CENTER "collaborate closely... provide clinics with emergency responders to triage patients"

PRIVATE PRACTICES "share call, contract for services, provide services and refer to and accept patients"

OTHER "established rural school-based health centers, provide services to non-profit organizations, medical direction to nursing homes, and assisted private businesses with ACA enrollment"

USING GRANT FUNDS TO IMPROVE PATIENT CARE

"Overall, primary care grant funds support the provision of services to our very large uninsured patient population allowing us to ensure that all patients have equal access to resources regardless of their economic status."
